INTRODUCTION

CV-160 is an IBM peripherals to Macintosh (Mac) Converter which includes the Video, Keyboard and Mouse signal converting. CV-160 allows user to connect a PS/2 Mouse, a PS/2 Keyboard and a PC used Monitor into its input connectors and converting the signals and then generating the Mac-ADB compatible signals to a Mac computer.

Besides a build-in ADB Interface for PS/2 Keyboard and Mouse, CV-160 also reserves an ADB Interface connector for other applications. CV-160 allows user to hot-plug the PS/2 Keyboard and the PS/2 Mouse at any time to operate the Mac. CV-160 supports a "Power ON/OFF" key to take place the "Power ON/OFF" key of the Mac Keyboard.

Fig. 1 CV-160 connection diagram

APPLICATION

CV-160 is compatible with the interface of CS-104, CS-122, CE-120, CV-130 and so on. Link together with the above devices provides Remote Control capabilities and Console switching functionalities for MAC, PC, and SUN station Systems.

SPECIFICATIONS

Function	Specifications
Power Consumption	50mA (max.)
Video In connector	DB-15 x 1 Male
Video Out Connector	HD-15 x 1, Female
ADB Interface	Mini DIN 4-pin x 2, Female
PS/2 Keyboard Connection	Mini DIN 6-pin x 1, Female
PS/2 Mouse Connector	mini DIN 6-pin x 1, Female
DIP Switch	8 bits x 1
Power ON/OFF	Push Button x 1
Status LED	Red LED x 1
Operation Temp.	5°C ~40°C
Stock Temp.	-20°C ~60°C
Humidity	0% ~80%
Enclosure	Plastic
Weight	130g
Dimensions (LxWxH)	100 x 80x 36 (mm)

INSTALLATION

1. DEVICE CONNECTION:

- 1) Mac must be powered off before cable connection for safety and peripheral enumeration.
- 2) Connect the CV-160 to a MAC computer, a PS/2 keyboard, a PS/2 Mouse and a PC Monitor, see figure 1.
- 3) Press CV-160 POWER ON/OFF key to turn on the Mac.

Optional Connection :

- 4) Remote control with CE-120, please refer to the User's Manual of CE-120, see figure 2.
- 5) Console switch with CS-104, please refer to the User's Manual of CS-104, see figure 3.

(The above device MUST have the PS2 function)

PREVENTING RADIO & TV INTERFERENCE

WARNING!!! This equipment has been tested and found to comply with limits for Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reoriented or relocated the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
